Fitzpatrick's Cactus Gardens

R.F.D. No. 3 ❖ Edinburg, Texas

A LIVEFOREVER IS A JOY FOREVER

Catalog No. 17

Price 25c

Conditions, Terms, Etc.

Due to the shortage of labor we cannot accept orders for less than \$1.00. In order to give you nice large plants, all shipments made via Express Collect.

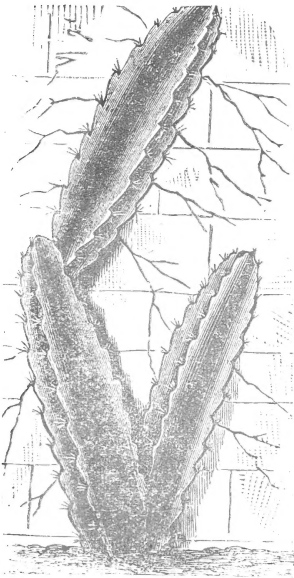

Cash or 25 per cent cash, balance COD, on all orders.

We will replace any damaged or unsatisfactory plants if returned to us within ten days.

Please list several substitutes or allow us to substitute for any shortages. Pottery shown is not for sale except where priced separately. No potted cacti offered for sale.

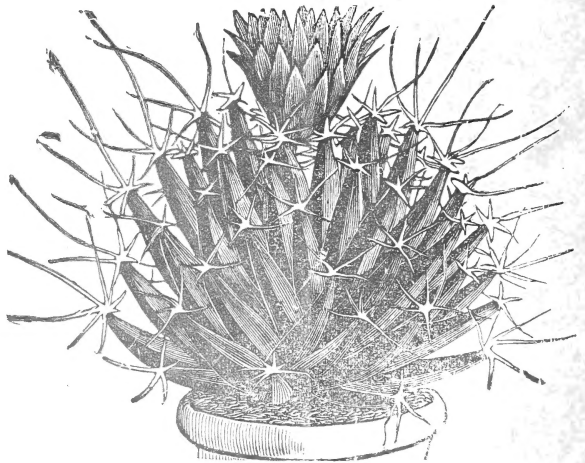

All of our plants are grown outdoors in Texas and with proper care will grow anywhere if protected from frost and freezing. No hot house or glass house tender babies.

Buy with confidence. You may return plants for full refund for any reason . . . or without a reason.

Hylocereus undantus
"Queen of the night"

A. Blanc cut
A climber and night
bloomer. 35c each

Leuchtenbergia prinzipis — Mexico
A. Blanc cut. 75c each

"My cacti that I bought from you most 3 years ago are beautiful. Have enjoyed them so much." Mrs. J. A. Toomey, Knoxville, Tenn.

"I received an order of cactus from you last year and I was much pleased with the plants. They have all done nicely for me." Mrs. E. N. Robinson, New Hampshire.

"My last plants from you are fine." Ella Nipper, Illinois.

OPUNTIA BRASILENSIS — From Brazil. A beautiful tree type plant. Round trunk with flat leaves.

Plants 15c

AIR PLANT — Bryophyllum tubiflorum. A curiosity.

Plants 10c

CENTURY PLANT — Agave Americana. With yellow striped leaves.

25c up

MAGUEY PLANT — Agave deserti — From Mexico. Plant that tequilla is made from.

25c up

CHRISTMAS CHEER — Sedum guttatum. Bright red succulent.

10c

COCONUT PALM — Broyophyllum Houghton Hybrid — Looks just like miniature palm.

10c

CORN COB EUPHORBIA — Euphorbia mamillaria.

Small plants 25c

COWN HORN — Euphorbia grandicornis. A large type fast growing euphorbia. From Africa. Small specimens 37c

CROWN OF THORNS — Euphorbia splendens. Most popular of all euphorbiats.

25c

ELEPHANT BUSH — Portulacaria afra. Bush with bright green leaves. Elephants feed on this plant. Small 9c

GHOST PLANT — Byrnesia weinbergi. Best known of all succulents. Will thrive on neglect. Attractive. Plant 9c

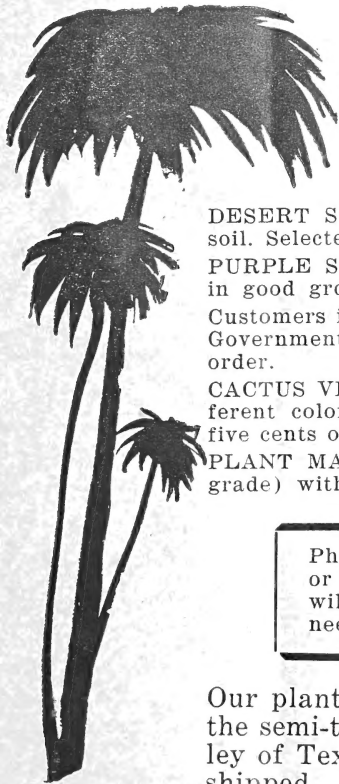

GIANT TOAD PLANT — Stapelia gigantea. Produces large star shaped flowers with terrible odor.

15c

MOTHER-IN-LAW TONGUE. Gasteria. Attractive plants.

25c

MEXICO SPECIAL —Astrophytum asterias, Lophophora williamsii, Thelocactus bicolor, Opuntia microdasy, Opuntia rufida, and Ariocarpus fissuratus. All for \$1.25. Ask for collection R-C.

Write us for prices on tree ripened citrus fruit. Sold only from November through April. Texas grapefruit is known to be the best the market affords. Select fruit from our own grove.

DESERT SOIL. For best results grow your plants in their native soil. Selected fertile desert soil — 20c per pound, any quantity.

PURPLE SAGE (Cenizo) Makes a wonderful hedge. Balled plants in good growing condition, 50c each.

Customers in Canada are limited to \$5.00 purchase by the Canadian Government. Be sure to get Canadian permit and send it with the order.

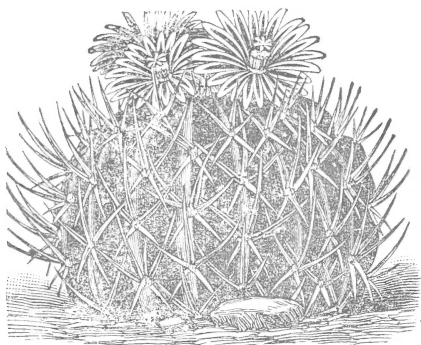

CACTUS VIEWS POSTAL CARDS. We usually have at least 20 different colored Cactus View Postal Cards on hand. Price two for five cents or three cents each.

PLANT MARKERS. Made of galvanized heavy duty tin (Pre-War grade) with slot for paper or fibre label. 5c each.

Photographs of specimen plants or photographs of your collection will be appreciated. Many will be needed for our next catalog.

Our plants grown out of doors in the semi-tropical Rio Grande Valley of Texas. No hot house babies shipped.

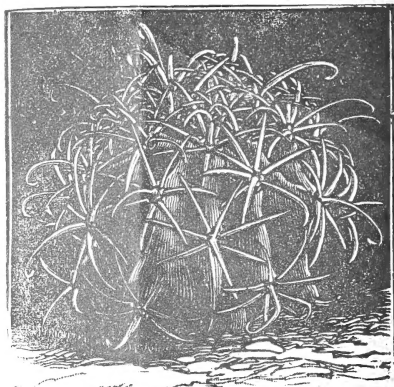

BARREL CACTUS
(*Ferocactus wislizenii*)

A. Blanc cut

Specimen plants \$2.50 and up

BARREL CACTUS
(*Ferocactus nobilis*)

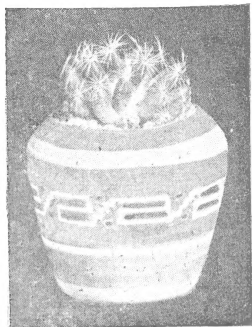

A. Blanc cut. 75c each

Cultural Guide for Cacti and Other Succulents

Upon arrival cactus plants should have any dry roots cut off, leaving only the live parts of the roots. Plant up to the previous soil mark in an equal mixture of garden loam, leaf mold, and coarse sand (but not ocean sand) adding a trace of charcoal and old crushed mortar.

Cacti and succulents, like all plants, require some direct sun, but must not be exposed to the sun rays continuously. In the deserts these plants always grow in the shadow of a bush or other plant.

Water causes the death of more cactus plants than any other cause. These plants should be well drained with some broken pottery in each pot, a hole in the bottom of each pot and should be watered lightly, preferably with a spray gun, often during the summer months. Each day is not too often if a very small amount of water is used. Never soak the dirt with water, and do not water for at least two months during the dormant winter period. A small amount of liquid manure or commercial fertilizer will aid the growth of cacti and succulents.

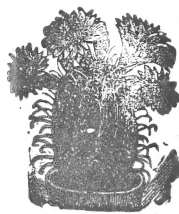

NIPPLE CACTUS
(*Dolichothele spaerica*)

Very rare. Most beautiful of all Texas cacti.
Large yellow flowers.

Large 3 inch plants 37c

Smaller 1½ inch 19c

GLORY OF TEXAS
(*Thelocactus bicolor*)

A. Blanc cut

Rare. 23c, 45c, ea.

**HEDGEHOG
ALOE**

(*Aloe humilis*)

Small gray green
plant. Most pop-
ular of all aloes.
3 inch plant 15c

APOROCACTUS flagelliformis

Rat Tail cactus. Large pink flower.
25c

CARNEGIA gigantea. Arizona Giant
Small plants will grow an inch a year.
25c

CEPHALOCEREUS palmerii

White hair, \$1.25

"Enclosed is check for \$1.00 to cover cost of two Aloe Vera plants which you forwarded by Express to me in Baltimore. You will be pleased to know that the doctors at the Marine Hospital in Baltimore were very much interested in the cactus treatment for burns. They had heard of it, of course, but apparently had not had or made an opportunity to put it into practice.

Mrs. Jones writes that the doctor in charge of her case is very well pleased with the rapid healing of her wound. It will soon be ready for skin grafting which is indeed splendid.

Thank you for all of the extra trouble to which you have gone to help us." — E. N. Jones, Pres. Texas College of Arts and Industries.

"One year ago last July we visited your Gardens and bought several plants which served as the beginning of an indoor cactus garden which we've enjoyed very much. Your plants were all nice and healthy."—Mrs. J. G. Schuckenbrock, Missouri.

"My cactus were in fine condition, thank you for the extra one. I shall order some more different ones Christmas." — Mrs. Chas. Yearsley, Ohio.

AUTOGRAPH CACTUS — Have your friends autograph this plant with any sharp object for a living memorial. 27c

PACHYCEREUS PRINGELI— A giant type cactus. Growing to immense size in many years. 5 inch plants 35c

OWL'S EYES — *Mamillaria parkinsonii*. White spines, yellow blossoms. From Old Mexico.

Specimen plants 50c and 25c

AGAVE NICKELSAE — Looks like Agave victoria. White striped leaves. A true beauty. Plants 35c

ESCOBARIA RUNYONII — A recent discovery. Named for former Mayor of Brownsville, Texas. A miniature. 13c

A popular arrangement. This type pottery found in most stores dealing in pottery.

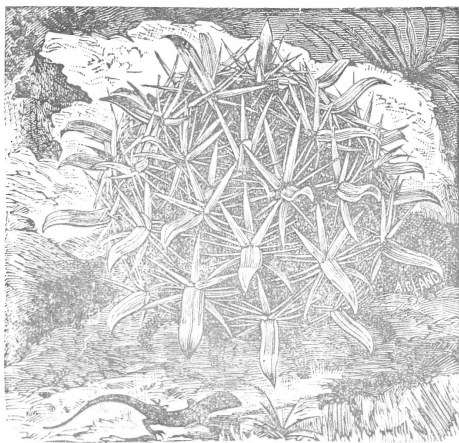

To Propagate from Cuttings and Offsets

Cuttings are best removed during the spring and summer months. Do not take cuttings during wet or cold weather for to do so would cause rotting of both the cutting and parent plant. Remove cuttings with a sharp, clean knife . . . never break off cuttings. Heal the cuttings for several days in a dry shaded place before planting. Root the cuttings in a shallow planting in clean, slightly damp mixture of sand containing peat moss and charcoal. As soon as the roots have formed, remove and plant as outlined under "Cultural Guide for Cacti and other Succulents."

Offsets may be removed at any time and planted in the usual way.

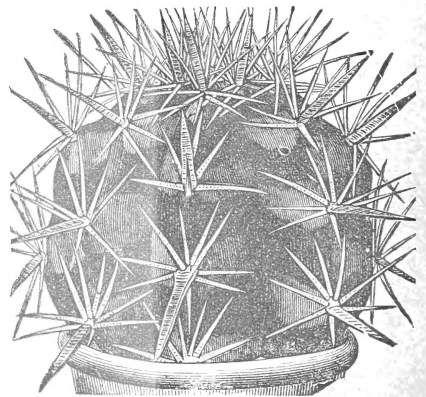

"The cactus arrived today and it was the nicest shipment we have ever had from any Texas concern. We are very pleased with it. You may ship at once whatever you have that we could use, up to 5,000 plants for this shipment." Cactus Pete, California.

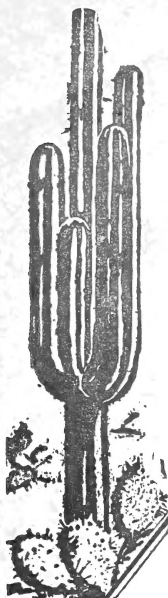

Ferocactus latispinus — Mexico

A. Blanc cut. 50c each

"I won sweepstakes in the Associated Garden Clubs in November with my cactus."—Mrs. Clark, Utah.

A. Blanc cut. What is this?

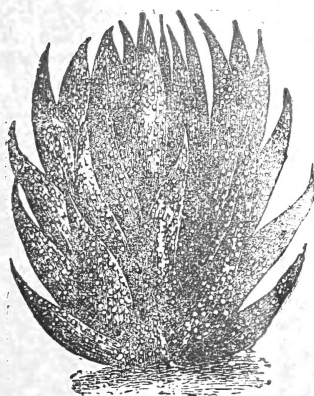

**PERUVIAN APPLE
CACTUS**

(*Cereus peruvianus*)

One of the fastest growing tall varieties of cactus. Used extensively for grafting stock.

Cuts 60c ft.; 2 inch 13c

**WART PLANT
(Haworthia margaritifera)**

Original A. Blanc cut
Mature plants 25c each

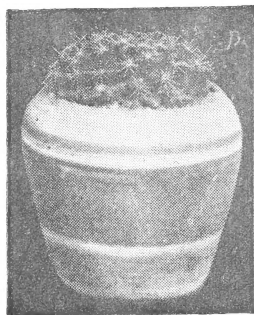

**ALOE VERA
(Unguentine Plant)**

Used to heal burns . . . especially X ray and Radium burns.

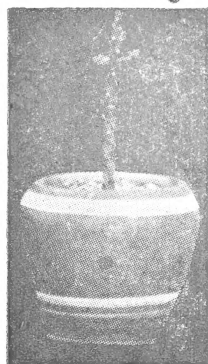

Large plants \$1.00

Small 3 inch plant 25c

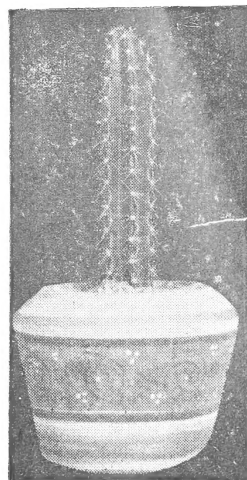

**PIN CUSHION
CACTUS
(Mammillaria
hemisphaerica)**

Bears beautiful edible red fruit . . . two years following white flowers. Large plants 4 or 5 inches 33c; 2 or 3 inch plants 17c

**MEXICAN PINE
(Opuntia leptocaulis)**

Called "tasajillo" by the Mexicans, this plant produces a beautiful little tree. 12 inch plant 60c; 5 inch plant 13c.

**ACANTHOCEREUS
pentagonus**

A fast growing night blooming cereus. 15c

FITZPATRICK'S CACTUS GARDENS, EDINBURG, TEXAS

ARIZONA GIANT — *Carnegie gigantea*. Largest of all cacti. Grows one inch per year.

Small plants about 1 inch 35c

BARREL CACTUS — *Ferocactus wislizenii*. Only specimens on hand.

\$2.50 up

BEAVERTAIL CACTUS — *Opuntia basilaris*. Attractive.

15c

BLIND PEAR CACTUS — *Opuntia rufida*. From Mexico. Like *Microdasy* but with red spines.

15c

BURBANK SPINELESS — *Opuntia ficus indica*. Also called Indian Fig cactus.

15c

BUTTON CACTUS — *Epithelantha micromeris*. Small white button.

15c

JUMPING CACTUS or Cholla Cactus. — *Opuntia bigelovii*. Dangerous beautiful white spines.

15c up

COWS TONGUE — *Opuntia linguiformis*. Grows near San Antonio, Texas. Popular long leaves.

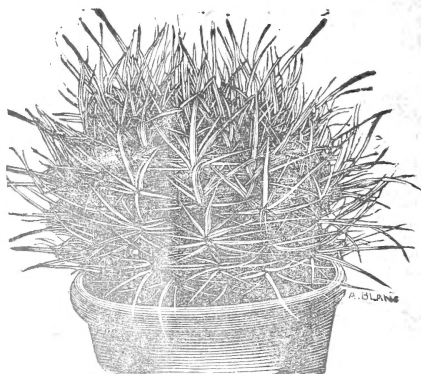

25c up

DAHLIA CACTUS — *Wilcoxia poselgeri*. Pencil cactus from Mexico. Large gorgeous flowers.

35c

DEVIL CACTUS — *Opuntia schottii*. Sharpest spines of all.

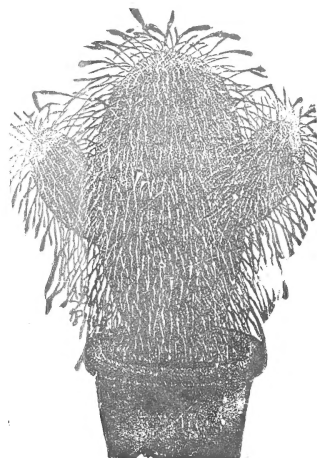

25c

FEROCACTUS ACANTHODES

A. Blanc cut

Very attractive. 75c each

LACE CACTUS

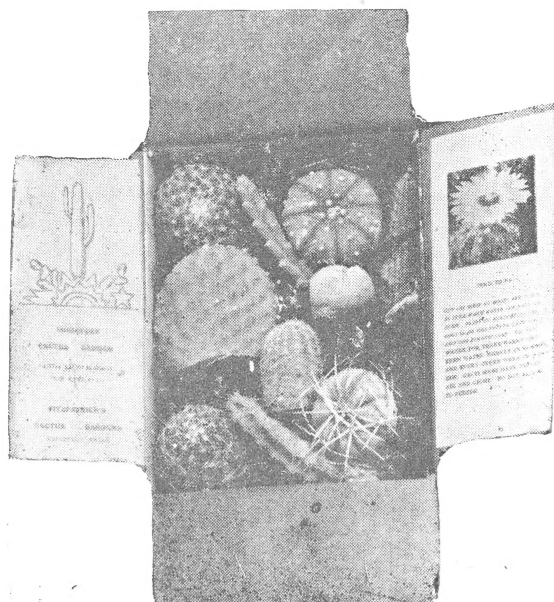

(*Echinocereus perbellus*)

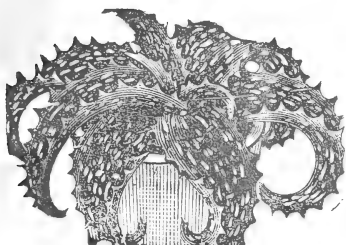

A. Blanc cut. 13c and 25c

MINIATURE CACTUS GARDEN

as shown at left with the following cacti: *Lophophora williamsii*, *Hamatocactus setispinus*, *Thelocactus bicolor*, *Mammillaria hemisphaerica*, *Chamaecereus silvestrii*, *Echinocereus pentaloopus*, *Opuntia imbricata*, *Nyctocereus serpentinus*, *Opuntia leptocaulis*, and *Dolichothele spaerica*. . . Complete with growing directions for \$1.50.

Collection A

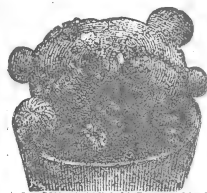

ALOE PICTA — Africa

A. Blanc cut

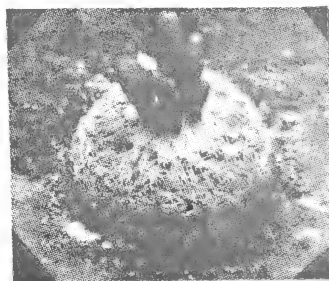

35c each

DOPE CACTUS
or **DRY WHISKY**
(*Lophophora*
williamsii)

A. Blanc original
cut. Contains a
powerful drug.

27c, 50c, \$1.00

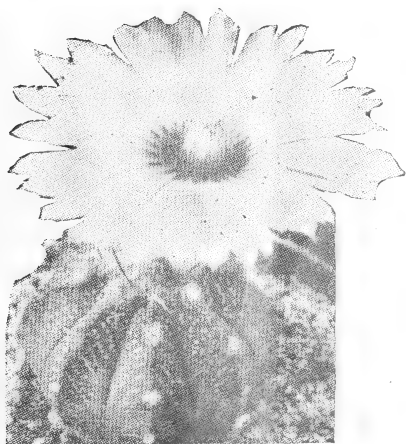

BUTTON CACTUS
(*Epithelantha micromeris*)

Also called golf ball cactus.
This plant bears harmless
spines and is white colored
and looks like a golf ball.
From old Mexico. Clusters
45c. Smaller mature plants
17c each.

Parrakeets, White King Pigeons, and
Registered English Cocker Spaniels.

Famed jade
plant. Most beautiful of all succulents. Specimen plant 18 inches tall sold for \$35.00 at a recent Houston flower show.

Plants with 3
heads 50c; with
1 head 15c

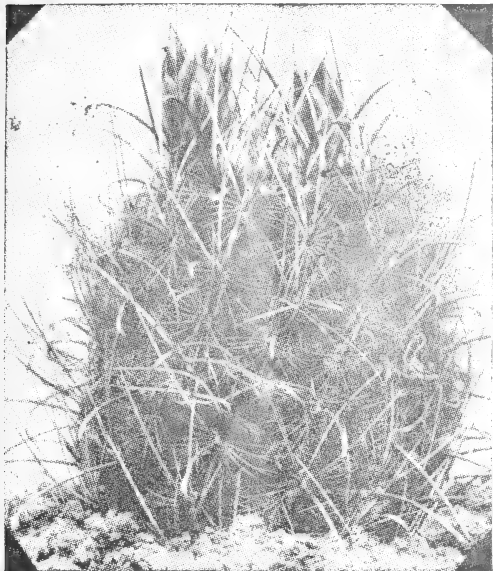

TWISTED RIB CACTUS
(*Hamatocactus setispinus*)

A. Blanc cut
13c and 25c sizes

Grafting Cacti

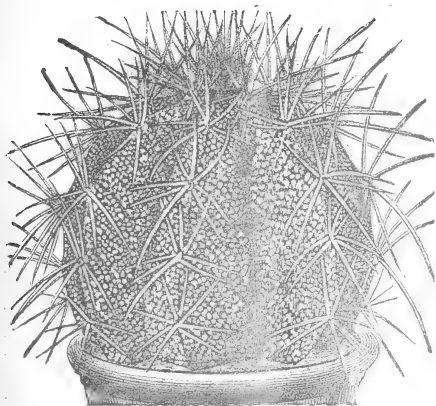

Grafting of cacti is used as a novelty and also to speed up the growth of slow growing plants. There is no limit to the number of oddities and attractive plants that may be produced through grafting. The well known Christmas Cactus and the Peanut Cactus respond better to grafting than most of the others. Grafted Christmas cacti have been known to produce more than a hundred beautiful blossoms. The simplest and most practical graft is known as the flat graft. Using a sharp, clean knife, cut off the top of the scion with a flat, horizontal cut . . . also cut the stock plant in a like manner and quickly place the two together; holding in place firmly with several small rubber bands. *Lemaireocereus prunosis*, *Cereus peruvianus*, *Nyctocereus serpentinus* and various *Opuntias* are better types to use as stock plants.

ANCISTROCACTUS *scheeri*

A fish hook cactus with greenish yellow flowers. 15c

"All the cactus ordered Nov. 17, 1943, doing nicely. Thank you for the gift cactus." Mrs. Geo. B. Beier, Glenside, Penn.
 "You sent me the nicest plants that I ever had for the same money." Mrs. Henry Close, South Dakota.

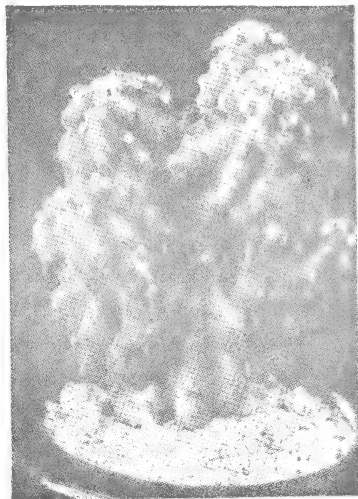

Astrophytum ornatum

A. Blanc original cut

From Mexico

Seedlings 25c, 50c, 75c

CURIOSITY PLANT

(*Cereus peruvianus monstrosus*)

A freak plant, forming in many grotesque shapes. Always attracts attention.

10 inch plants \$1.00

4 to 6 inch cuts 48c

DEVIL'S HEAD CACTUS — *Homaloccephala texensis*. Used by the Mexicans in candy making. 35c

EASTER LILY CACTUS — *Echinopsis* hybrid. Free bloomer. 15c

ECHINOPSIS EYRIESII. Many white flowers. 25c

GOLDEN BARREL CACTUS — *Echinocactus grusonii*. A must for every collection. 30c up

JOSEPH'S COAT — *Opuntia monacantha variegata*. Beautiful red and white and green leaves. 25c

MEXICAN DWARF TREE CACTUS — *Opuntia villis*. A miniature tree cactus. Pretty. 25c

MOON CEREUS — *Selenicereus grandiflora*. One of the largest flowers. 25c

MYRTLE CACTUS — *Myrtillocactus geometrizans*. Bluish green plant.

25c; large cuts 75c

ORANGE TUNA — *Opuntia elata*. — Large yellow flowers and large yellow tuna. One of the most attractive opuntias. Plant 35c, cut 15c

DEER TONGUE — *Nopalea auberi*. — Red flowers longer than any other opuntia. Plant 35c, cuttings 15c

NOPALEA VARIEGATA — Most attractive form of *nopalea*. Like Josephs coat only more vigorous. Plants 35c, cuts 15c

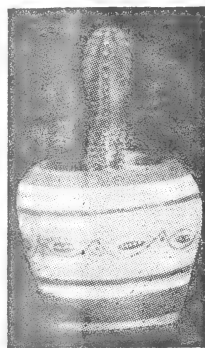

HAWORTHIA MINIMA 15c. *H. sub rigida* 25c, *H. radula* hybrid 25c, *H. fasciata* 35c.

EUPHORBIA TRIANGULARIS 35c, *E. ssquarrosa* 50c, *E. lactea* 25c, *E. Echinus* 25c, *E. similis* large \$2.00, *E. candelabra* \$1.50, *E. pseudocactus* \$1.00 *E. canariensis* 35c, *E. aggregata* 35c.

SCARLET BUGLER — *Cleistocactus baumannii*. Brilliant scarlet flowers. Easily grown. 16c

WOOLY TORCH CACTUS. *Cephalocereus palmeri*. Powdery blue plant body with snow white hair. 6 inch specimens 75c

MONVILLEA DIFFUSA — An unusual plant. 15c

Cereus peruvians, tall, fast growing Peru, 15c

C. p. monstrose, a freak, unusual, 48c
C. schmolli, small, rare, hard to grow \$1.25

C. viladus, bluish green, 20c

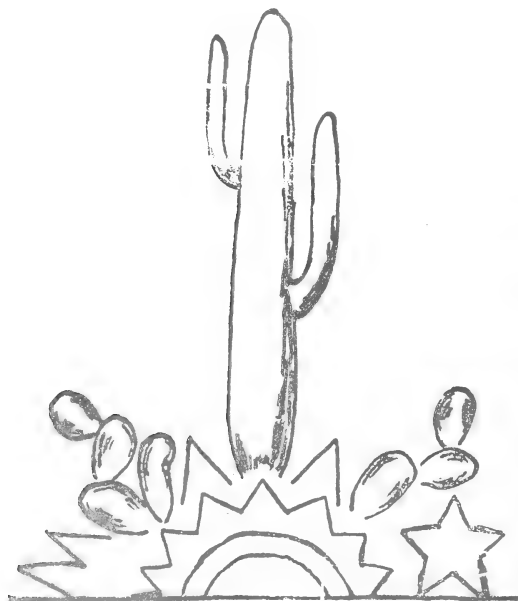

CANDELABRA CACTUS — *Lemaireocereus weberi*. Will grow into a giant candelabra. Small plants 35c

PILOCEREUS NOBILIS — 35c

HARRISIA MARTINII — Nocturnal white flowers. Fast growing. Small plants 35c

OPUNTIA TEPROCACTUS. each 25c

OPUNTIA CYLINDRICA. Most attractive of cholla type cacti. 15c

100 Species of choice cacti and succulents. Our selection \$9.85

Cacti and Succulent Pest Control

Ants. Most commercial ant poisons are effective if used heavy and consistently. Ants cause more damage than any other insect and should be kept under control at all times.

Spine Bugs. About the size of a grain of wheat, these fuzzy, white or gray wax-like bugs are also called "mealy bugs" and are promoted by ants. Spraying with denatured or wood alcohol will help, but for best results spray with mixture of one pint warm water, $\frac{1}{2}$ teaspoonful soap powder, 10 drops "Black Leaf 40" and 2 teaspoonfuls of any good oil spray.

Root Mealy Bugs. Dip the plant, pot and all, in solution of one teaspoonful of nicotine solution to one quart of water. Leave the pot in the water for 30 minutes. If planted in the ground, pour the solution around the plant.

Red Spider. Use sulphur dust. Shake from cloth bag as a preventative.

Cochineal. Use same treatment as for mealy bugs.

Thrips and Rust. Spray with mixture of $\frac{1}{2}$ teaspoon "Black Leaf 40," 1 teaspoon soap powder (or any soap in like amount) and 1 pint of warm water each third day for nine days.

Nematodes. Nematodes may be introduced in many ways — either with plants, soil, or used pots. To stop this root infection cut off and burn all damaged roots, and repot in soil sterilized by heating to 135° F. Examine the plants thoroughly with microscope and cut out all infected parts or burn the entire plant and buy healthy plants.

Slugs, Snails, and Sow bugs. Powdered Meta or solid methylated spirits will attract and kill these pests or you may buy a ready mixed preparation such as "Snarol."

Borers. Open up point of entrance and introduce small amount of mercury. After the borer floats out, you may return the mercury to a bottle for further use and dust the incision with sulphur dust and keep open until healed over.

Black Rot, Decay, Bruises, etc. Cut off all damaged parts with clean, sharp knife and dust sulphur on the scar and keep dry until caloused.

DAHLIA CACTUS

(*Wilcoxia
poselgeri*)

A. Blanc cut

Produces a beautiful pink flower.
Rare. 25c, 50c, 75c

CACTUS INTORTUS

Porto Rico

A. Blanc cut

50c each

GOOD LUCK PLANT — *Sanseveria zeylanica*. One of the most popular of all succulents. 15c

MEXICAN LOVE PLANT — *Bryophyllum pinnatum*. A leaf will grow if pinned on a curtain. 9c

PEN WIPER — *Kalanchoe marmorata*. A purple spotted leaf. Attractive and desirable. 15c

SPROUTING LEAF — *Bryophyllum diagraphum*. Produces small plants from each leaf. 9c

STAR FISH (Toad Plant) — *Stapelia variegata*. Most popular of all stapelias. Star shaped flower. Each 9c

We can secure any plant for you that is available in America if given about fifteen days to secure the plant.

OPUNTIA LINGUIFORMIS or Cow-Tongue Cactus. Rooted cuttings, about 6 inches long, 35c each. This rare *Opuntia* grows near San Antonio, Texas, and is found no place else as a native. (Available)

DEVIL CACTUS (*Clavellina*) *Opuntia schottii*. This rare cactus has extremely sharp and dangerous spines. A native of the Rio Grande Valley of Texas. Small plants, about 3 inch, 18c.

OPUNTIA KLEINIAE. Very much like *Opuntia Tasajillo* or *Opuntia leptocaulis*, but has larger stems. 25c each

Tell your local cactus dealer to write to The Cactus Gardens, R. 3, Edinburg, Texas.

Our A. Blanc photographs are reprinted from the original A. Blanc cuts — America's first cactus catalog — Courtesy Texas Cactus Growers.

TIGER ALOE, (*Aloe variegata*) often called Partridge Breast is well known everywhere. Most attractive African plant. 17c each.

SANSEVERIA CYLINDRICA. This hard to get and slow to grow plant available most of the time. Small plants 35c each.

GASTERIA HYBRID (Ox Tongue). Require sandy soil. Produce orange colored, bell shaped flowers. Very attractive. 23c each.

CHRIST THORN, (*Euphorbia splendens*). One of the most popular of all succulents, will thrive on rich soil and lots of water. 4 to 6 inch plants 23c each.

OPUNTIA BASILARIS. The Beaver Tail Cactus. A native of southern California. Very attractive. Small plants 13c each.

SOIL CONDITIONER. Especially prepared to aid in the growth of cacti and other succulents. Often will revive weak plants. Small size, 8 oz. 45c. Large size, two pounds, \$1.50.
